ABOUT US

We are passionate climbers, dedicated shapers, skilled material engineers, and avid enthusiasts united by our love for climbing holds. Our journey began in 2017 when we first cut our initial form in our garage. Today, we have evolved into a dynamic team committed to producing top-quality climbing holds. Fueled by our innovative use of PU material, our mission is clear: to provide holds that are not only lighter, stronger, and more durable but also embody stunning aesthetics.

We redefine gravity, one hold at a time.

2023 IFSC WUJIANG WORLD CUP

@dimitris_tosidis

Technical Info

INSTALLATION

- For screw-ons: Use minimum 4.5mm screws and ensure there are enough fixing points to prevent holds or volumes from being pulled out in any situation.
- For bolt-ons: Use countersunk or cap head M10 bolts. If needed, add extra screws to prevent spinning and distribute force evenly.

Polyurethane holds are not subject to cracking but they have to be checked when setting or unsetting routes. Neither the manufacturer nor the dealer can be held responsible for any misuse of holds and fixations.

MAINTENANCE

Holds have to be cleaned with a dry brush regularly when they are fixed on a wall. They need to be cleaned with water that does not exceed 60°C without any detergent.

PUMAX

Since 2017, AGHOLDS has been actively developing PU (Polyurethane) materials for climbing holds. By 2018, we successfully completed the development process and incorporated these materials into our climbing holds production. Our PU material offers numerous advantages, including high strength, impact resistance, lightweight properties, vibrant colors, and eco-friendliness.

After five years, PUMAX, our innovative polymer compound material created in collaboration with the National Institute of New Materials, will make its debut in AGHOLDS' new climbing holds production in 2023.

X5

PUMAX provides five times enhanced abrasion resistance compared to previous PU materials.

X3

PUMAX demonstrates a threefold improvement in fracture testing.

80°C

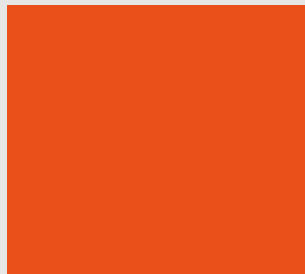

PUMAX maintains peak performance even in an 80°C environment.

COLOR INFO

We offer 12 colors to choose from, and the standard color scheme is as follows:

Traffic Red
RAL3020

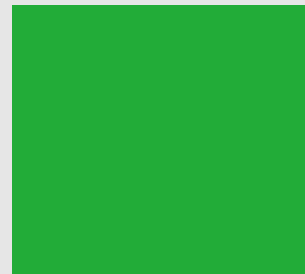

Luminous Orange
RAL2005

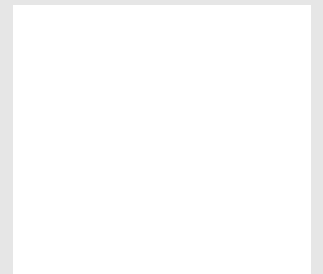

Traffic Yellow
RAL1023

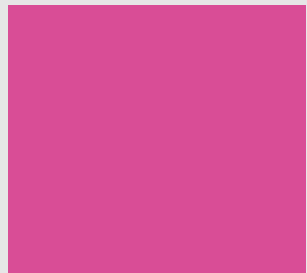

Pure Green
RAL6037

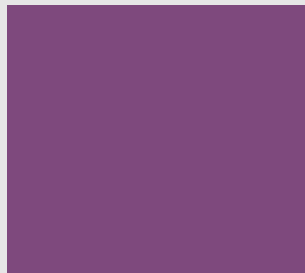

Luminous Green
RAL6038

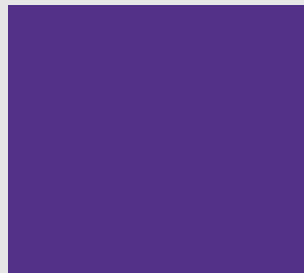

Traffic White
RAL9016

Pink
Pantone806c

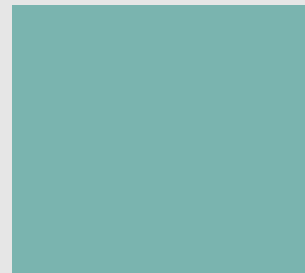

Signal Violet
RAL4008

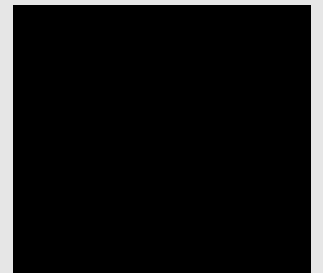

Purple
07-13

Sky Blue
RAL5015

Mint
RAL6027

Jet Black
RAL9005

Disclaimer: The colors displayed on a monitor may differ from the colors you will receive. If you require a color match or wish to see a specific color, please contact us for a sample.

Sustainability

During the production process, PU does not release any toxicity. Simultaneously, in the development of PU & PUMAX, we have employed biotechnology.

To further enhance environmental sustainability, AGHOLDS has established a long-term partnership with a local energy recycling company for the recycling of PU waste materials in our production process.

ABOUT SHAPER

Yaojun Ge

Yaojun “The Teacher” Ge is our head shaper.

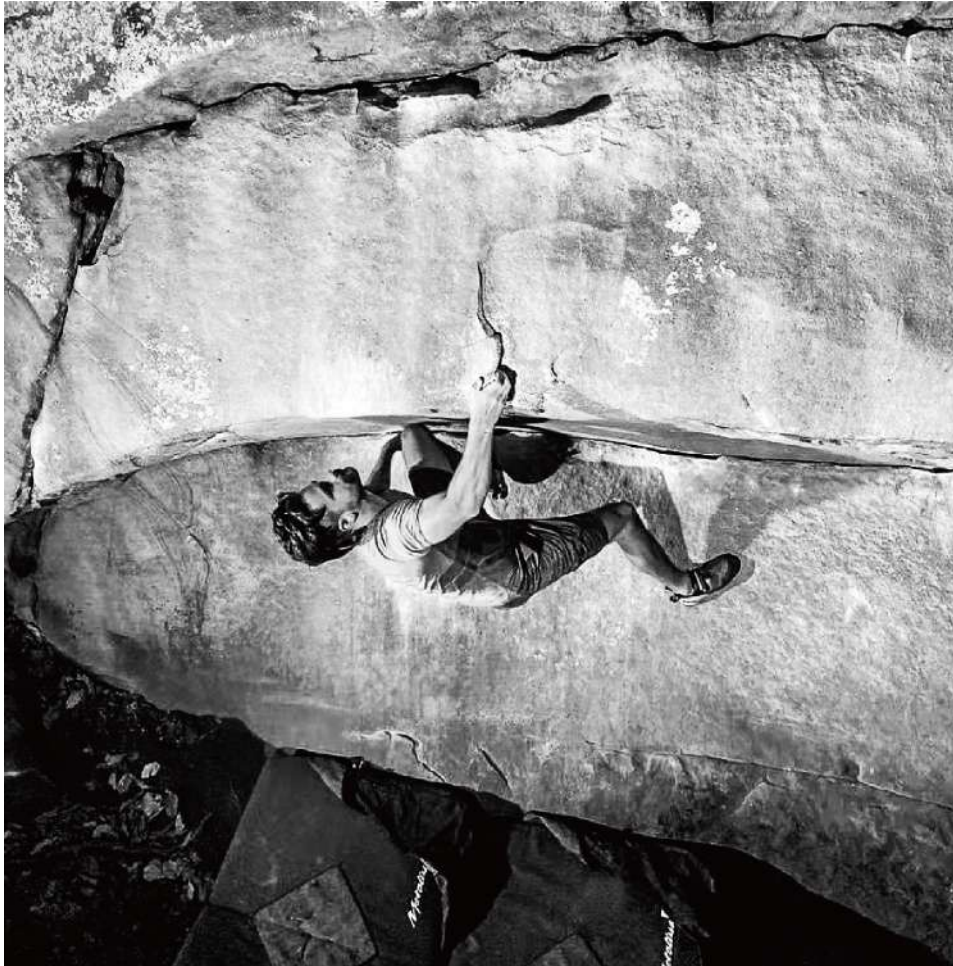

After completing his master's degree, he taught physical education at a high school and was responsible for training youth climbers. He has successfully coached numerous athletes at the national level.

In addition to his coaching responsibilities, he actively contributes to the development and design of new climbing holds for AGHOLDS. He is passionate and imaginative when it comes to creating climbing holds.

ABOUT SHAPER

Chris Neal

Chris had his first experience with climbing at the age of 16, by the age of 18 he was climbing regularly at the gym and outside. Shortly after he built a homewall and bought his first holds where his inspiration for designing holds began.

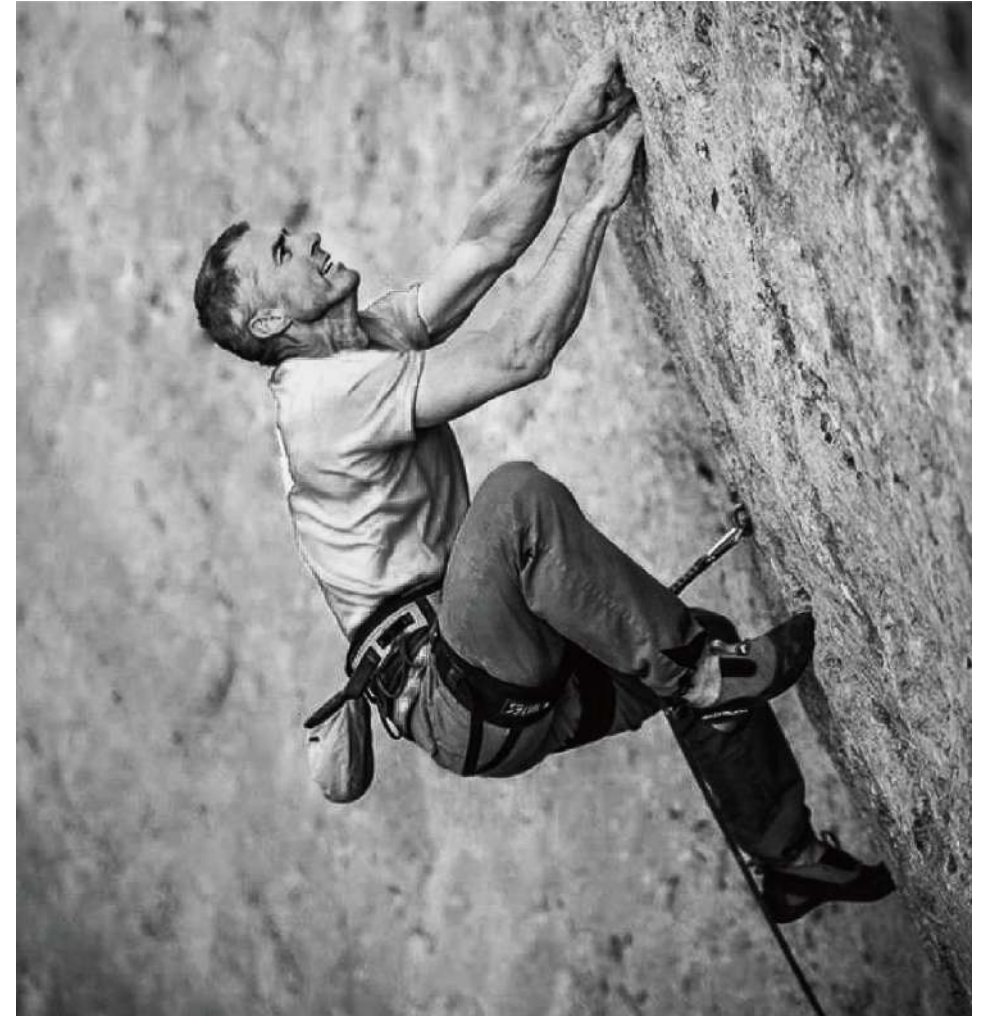

With some local craft store floral foam and basic sculpture tools he began crafting his first designs. He received his first opportunity at commercial shaping for the brand Vision Climbing and since then he has worked with multiple companies as well as building his own brand Capital Climbing. Chris is currently living in South Carolina.

ABOUT SHAPER

Louie Anderson

Louie "The Legend" Anderson start shaping from 1980s.

Louie is one of the most experienced shapers. He has shaped for dozens brands, including Dimension Volumes, Kingdom Climbing , Element Climbing, Working Class and So ill, etc.

ABOUT SHAPER

Kegan Minock

Kegan started climbing in 2003.

While being a competitive climber, he has been routesetting since 2007. His was always artistic and thought that creativeness transferred well into learning how to design climbing holds.

In 2014, he sold his first designs to fellow AGholds shaper Chris Neal. Since then, he has become a freelance holds shaper and has shaped for over a dozen different brands. He currently lives in Colorado Springs, CO where he is the head Routesetter at Gripstone Climbing.

A stack of several green, curved plastic components, possibly lids or caps, arranged in a slightly offset manner. Each component features a white logo consisting of a stylized 'S' inside a triangle. The components are set against a dark, almost black background, which makes the vibrant green color stand out. The lighting is soft, highlighting the smooth texture and rounded edges of the plastic.

The image features a dark, monochromatic background with several overlapping, curved, and slightly textured shapes that resemble parts of a machine or a futuristic interface. Bright, elongated highlights are scattered across these shapes, creating a sense of depth and movement. The overall aesthetic is sleek and modern.

The image shows three blue, curved plastic components, likely parts of a machine. Each component has a smooth, slightly textured surface and a darker blue stripe running along its length. Small screws are visible on the flat surfaces. A small, embossed logo is present on the central component. The background is plain white.

A black and white photograph showing a close-up of a person's hand holding a small, irregularly shaped, textured object. The object appears to be a piece of rock or mineral with a rough, crystalline surface. The hand is positioned on the right side of the frame, with fingers wrapped around the object. The background is dark and out of focus, with some indistinct shapes that could be parts of a person's body or clothing. The lighting is dramatic, highlighting the texture of the object and the skin of the hand.
